Proposed Title : **CampusSphere: Role-Based Online Portal with Progressive Web App for Campus Mapping**

Alias : Dutchess

Date : February 12, 2026

PRE-PROPOSAL PRESENTATION RECOMMENDATIONS, SUGGESTIONS AND COMMENT (RSC)

PROPOSAL SECTION/CONCERN	RECOMMENDATIONS, SUGGESTIONS AND COMMENT (RSC)	ACTION TAKEN
Campus Mapping / Floor Plan	The project must include the exact campus floor plan and entrance exit to ensure accurate mapping and directions.	A requirement was added stating that the system will use the official/exact campus floor plan per building and floor as the basis for the interactive map.
Offline Mode (PWA)	The system should have offline functionality so it can still be used even without an internet connection.	Offline mode was added to the scope using Progressive Web App (PWA) caching to allow access to the campus map and basic information even when offline.
Entrance and Exit Points	Include campus entrance and exit points for navigation enhancement, proper user guidance, and emergency route awareness support.	The scope was updated to include the mapping of all campus entrances and exits, including building entry/exit points, to improve route guidance and navigation accuracy.
